

gramit

What is a ***gramit!*** A short description of the most important thing that happened to you last week - presto, a ***gramit*** is born.

A ***gramit*** is a short and easy way to share - we suggest with your grandparent(s). They could be as important as a graduation or as minor as an ice cream cone on a hot day – whatever comes to your mind that week when you are tweaked to submit your ***gramit!***

People are surprised at the wealth of information that is conveyed in ***gramit's*** and over the long term they create a documented history that will be cherished for literally generations to come.

Instant messaging, texting, tweets etc. are all abbreviated messages of the moment that years later, even if accessible, are largely incomprehensible as their original context is lost. ***gramit's*** have a constant context, ***“that week's most memorable moment”*** and will always remain relevant.

And of course consistent communication between grandchildren and grandparents has significant benefits for all those involved – ***“children with ongoing consistent contact of substance with their grandparents grow up to be happier more successful adults!”***

It's easy!

Click on the *gramit* icon contained in the reminder that GrannyConnect sends you weekly and complete your *gramit*.

Hit “send” and completed *gramit* is sent to your grandparent(s).

Exchange correspondence with you grandparent(s).

Enjoy your *gramit's* at any point as we document them into a *gramit* log.
